

Standard Dog House Requirements

Entrance and hallway separate from sleeping area.

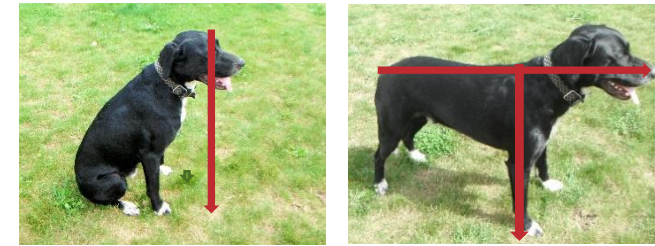

Separate sleeping area appropriate for size of dog which contains clean, dry bedding sufficient to provide insulation from the cold (e.g. blankets, straw or wood chips) .

Access door to clean out sleeping area

Measuring your dog

Sitting Position Standing Position

Measuring the Sleeping Area

Minimum Floor Space equals:
232cm² (36in²) for every 2.5cm (1in.) in height in standing position.

Example: Dog is 25in. in height standing
Area = 36 in.² x 25 in = 900 in.²
= 30 in. x 30 in.
= 2.5 ft. x 2.5 ft.

Minimum ceiling height equals:
5cm (2in.) greater than height in sitting position.

Example: Dog is 27in. in height sitting
Ceiling height = 27in + 2in = 29 in.
